

Gloves wish
they fit this well.

The **ComfortGel™** Nasal Mask brings a new level of fit and comfort to the Comfort Series.™ An exciting new approach to fully customizable gel masks combines premium comfort features with a host of new innovations. These changes help the ComfortGel fit right the first time. And that helps the Comfort Series fit 100% of your patients 100% of the time.

t h e c o m f o r t s e r i e s ™

ComfortGel™

Comfortable and customizable, the latest addition to the Comfort Series™ of Masks fits right the first time.

The ComfortGel™ Nasal Mask makes it easier to fit patients right the first time – even hard-to-fit patients. At its core is an exceptional cushion that combines the customizable blue gel originally seen in the Profile™ Lite with a proven dual-layer cushion design found in other Comfort Series masks. This combination gives you the comfort, fit, stability and seal characteristics you've come to expect from Comfort Series masks.

This superior cushion is paired with the new StabilitySelector™ that tilts the mask to allow for an optimal seal. The forehead pad automatically adjusts to ensure proper forehead placement and angle. Combining the StabilitySelector and the dual material cushion with a silent exhalation port and new "ball-and-socket" headgear attachments adds up to a superior mask that can help your patients stick to their therapy.

Delivering more features in a smaller, more compact package makes the ComfortGel an easy choice. Our streamlined sizing system makes it easier to stock. And adding the ComfortGel to the Comfort Series makes it possible to fit 100% of your patients 100% of the time.

ComfortGel uses Respironics' one-size-fits-most **Deluxe Headgear**. This unique headgear with Velcro® tabs easily adjusts in eight places for a secure, custom fit. The Deluxe Headgear evenly distributes tension, adds stability and helps to prevent mask leaks. ComfortGel and Headgear disassemble easily for cleaning and replacement. The Headgear can be used with most Respironics' masks.

The ComfortGel's blue gel inner layer can be easily customized to give patients a truly personal fit.
